DDS&T-1880-82

16 April 1982

MEMORANDUM FOR THE RECORD

SUBJECT: Telecon between C/PD/OL and C/PMS/DDS&T,
Subject of FBIS Machine-Assisted Translation Device

As a result of the briefing received on 15 April, it was determined and agreed to between the parties that while FBIS refers to the next phase of the subject undertaking as production, it does not qualify as production within the meaning of the DDS&T contracting officer's delegation of authority. Based on the foregoing, it was agreed that the maintenance of the presently delivered hardware (from Chason, Rosen and Wallace, Alexandria) would continue to be provided via an ODP/PD contract and (2) the software maintenance and/or enhancements would be handled by the ORD Contracting Officer with an FBIS COTR. On this latter point the Director/ORD has concurred to permit this relationship.
